Frameworks & Library: React.js, Express.js, Next.js, React Native, Shadcn UI, Tailwind css

Database: MySQL, MongoDB, Appwrite, Firebase

Projects & Experience:

NF Image AI

[\[nf-image.navedx.com\]](https://nf-image.navedx.com)

nf-image ai is a web app with tools like **background remover** and **text-behind-image** editor, built using **Next.js**, **4 AI models**, and **react-konva**. It supports real-time in-browser editing with canvas. Hosted at **nf-image.navedx.com**, it highlights my skills in **AI integration** and **dynamic UI design**.

ConvertXpert App

[\[github\]](#) [\[app link\]](#)

ConvertXpert is a **React Native** app with a **beautiful UI**, offering **currency, length, area, volume, weight, temperature, speed, pressure, and power conversions**. It uses a real-time **API for currency** conversion and is **published on the Amazon Appstore**, showcasing my skills in **full-stack development**, API integration, and **UI/UX** design.

React Native Learner App

[\[github\]](#) [\[app link\]](#)

The **React Native Learner App** demonstrates essential **React Native** components like **TextInput, FlatList, SectionList, Class Components, useState, useEffect, Lifecycle methods, FlexBox, TouchableHighlight, RadioButton, ActivityIndicator, Stack & Tab Navigation**, and includes a **Quiz App**. **Published on the Amazon Appstore**, showcasing my skills in React Native development.

chatapp

my personal project for chat my freind in real time without third party auth **full stack web app** in this project **socket.io, mongoose, express.js, react.js, zustand, react router** for style **tailwind css**.
